## EXPERIENCE

MARCH 2021 – PRESENT

**ORDER MANAGEMENT SYSTEM INTEGRATION DEVELOPER, TECSYS INC. OMNI™  
RETAIL SOLUTIONS (C# | .NET FRAMEWORK | AZURE | RAZOR)**

- Integrated over 100+ new/change request features with big Retail Clients such as Columbia, Sephora, and Ubisoft to production.
- Developed integrations for various payment gateways such as PayPal, Stripe, Adyen.
- Highly experienced in REST API development and integrations.
- Successfully integrated shipping providers such as Canada Post, Purolator, and DoorDash.
- Experienced in using standard Agile methodology (SCRUM) and tools such as Confluence and Jira.
- Refactored and improved inventory tasks speed performance by 30% used by all clients in production.
- Successfully resolved 5+ severity 1 issues as the main developer involved in production.
- Investigated, debugged, and resolved over 150+ reported bug tickets.
- Integrated virtualized inventory visibility between order management system and cloud-based headless commerce platform.
- Experienced with productions that involve cross-team collaboration with management, business analysts, DevOps, and QAs.
- Developed a custom pub/sub event relay project using latest .NET 6 hosted on Azure that listens to real time events from Amazon SQS, Google Pub/Sub, Azure Service Bus, and any custom event driven applications and relays them to webhooks.
- Created Azure CI/CD pipelines and releases for multiple project repositories.

SEPTEMBER 2019 – AUGUST 2020

**FULL STACK DEVELOPER INTERNSHIP, ONTARIO MINISTRY OF GOVERNMENT  
AND CONSUMER SERVICES (ANGULAR | .NET CORE | POWERSHELL SCRIPTS)**

- Analyzed requirements, designed, and developed a web application (Angular/.Net Core/MS SQL) to provision servers with the use of REST APIs.
- Developed scripts (PowerShell) to automate the workorder processes to give users access to on premise Windows and Linux servers.
- Designed and developed code for the migration of privileged access management and automation for the bi-election server management.
- Developed macros (VB script) to populate system information from load balancers and firewalls.
- Various Database administration task: created schema to migrate existing privileged account management to newly bought service.

**MAY 2018 – DECEMBER 2022**

**WEB DEVELOPER, GARDIO.NET (PERSONAL WEBSITE)**

- Successfully deployed and self-maintain a website where I post my various applications that I make out of curiosity and whatever I find interesting to create.  
(Angular/ASP.NET/MSSQL stack)

**MAY 2016 – MAY 2018**

**TECHNICIAN, TECH DOC CLUB, YORK UNIVERSITY**

- York University's Tech Doc Team that service students or clubs for technical problems.

## EDUCATION

**SEPTEMBER 2016 - DECEMBER 2020**

**BACHELOR'S DEGREE IN INFORMATION TECHNOLOGY, YORK UNIVERSITY**

**NOVEMBER 2021**

**MICROSOFT AZURE DEVELOPER ASSOCIATE, LICENSES & CERTIFICATIONS**
